**Character Modifiable/Fixed definitions:**

If a trail is designated as **Character Modifiable**, it may be improved with berms, jumps and the speed may be increased, however, intersections should not have their speed increased, and the usual erosion prevention standards should be observed Also, modifications should not change the skill level of the trail (don't put a Black Diamond gap jump in the middle of a Blue trail).

If a trail is designated as **Character Fixed**, it may be repaired, root armoured & given erosion prevention measures such as waterbars, but it care should be taken to not change the nature of the trail with regard to speed, flow, or jumps.
